

Tackling the Biggest PEO Challenges

by John Heaton

What are the biggest challenges for a PEO? Well, here's a pretty big one:

The very mention of a new client requiring Certified Payroll sends many PEO payroll departments ducking for cover. No need to duck any more. PayPlus Software tackles the biggest challenges—and PayPlus has revolutionized Certified Payroll processing. It is now as simple as ***One, Two, Three***:

One, the client enters the hours on the WEB using ezPayPlus.

Two, the hours are imported into PayPlus (no keyboard entry).

Three, a PDF version of forms WH-347 and WH-348 are automatically populated with the required data and are signature-ready.

This powerful new feature simplifies the most complex payroll process to nothing more than just another payroll. Even better, only PEOs who use ezPayPlus can offer online Certified Payroll entry to their customers. You'll be offering a service your customers can't find anywhere else. Tackling the biggest challenges—and simplifying them—beats ducking them anytime!
